

Tips For Detecting Scams

For more tips on detecting scams, follow us on Facebook, Twitter or Instagram @FandMBankNE

1. If you receive a call making claims about a card or asking for personal information, hang up, and call the company directly.

2. When receiving a suspicious email, check for misspelled words, suspicious sender email domains and links asking for private information. Never open an unexpected attachment.

3. Always do your research. Do not let someone rush you into donating or making a purchase you have not checked into yourself. Simply hang up the phone or delete the message.

Are you a victim of fraud? F&M Bank can help with identity theft repair. Ask us about CyberScout and your coverage.
